Autism & ADHD Awareness @ ONWC

Lectures:

- 9:00 am Meet Practitioners over tea, snacks
- 9:30 am Environmental Intoxicants: their role in brain dysfunction
- 10:15 am Clean Homes, Clean Water
- 11:15am Update: Special Diets for Special Kids
- 12:15 am Osteopathy for ASD
- 1:15 pm Demos: NAET; Osteopathic Manual Therapy; Tricks for giving supplements

A child with Autism faces various challenges throughout life. They include behavioural problems, sleep and eating difficulties, immune irregularities, nutritional deficiencies and gastrointestinal problems. Genetics and environmental toxins are key contributors. Today's event will showcase how our talented team offers in-depth knowledge and effective treatments that will benefit you and your family.

Naturopathic Care & Holistic Nutrition

Led by Dr. Scott Clack who has been treating ASD children since 2001, our team of ND's and holistic nutritionist coordinate treatment with herbal or homeopathic medicines, nutritional supplements, B12 injections, nebulized glutathione along with special diets such as GF/CF/SF, SCD or GAPS.

Osteopathy and Caregiver Support Services

Osteopathy is a form of manual therapy aimed at treating many health complaints using the principle that the body has an ability to self-heal, self-regulate and adapt. Osteopathic Treatment includes gentle soft-tissue techniques (including craniosacral techniques), joint articulation, stretching, and exercise.

Caregiver Support: We know being a parent/caregiver to a special needs child can be stressful. Learn how we can help you pamper

Please join us for our 3rd Autism & ADHD Awareness Day. Call to reserve your seat – space is limited.
